

FURNITURE THIS IS OUR PASSION

DEAR SIRs

It is with great pleasure that we have the honor to present to you our new catalog featuring the latest furniture collections. We are a Polish company established in 2002. Currently, we have one of the most modern manufacturing plants in Europe, where we employ over 450 people in total. Feniks is a family-owned company built on three fundamental pillars: • people • passion • innovation. We export our products to many European countries, and for several years we have had the pleasure of presenting our collections in the domestic market, where many clients have trusted us. In our catalog, you will find many collections with diverse designs and comfort. In creating our collections, we drew inspiration from you, we listen to people, we see needs - we react.

With respect, Mariusz and
Waldemar Nierzwiccy

FURNITURE IS OUR PASSION

P R O D U C T I O N Feniks is one of the most modern production facilities in Europe. Innovative technological solutions, the latest machines, and production lines fully meet your quality, design, and logistical expectations. **T E C H N O L O G Y** We have a modern, innovative, and comprehensive machine park that allows us to optimally utilize production resources. We fully control the supply chain and all stages of production to ensure you the highest quality of the products offered. **S A L E** Currently, we have over 150 sales points in Poland and are continuously intensively developing the sales network to provide you with optimal purchasing opportunities for our products. **T A P I C E R N I A** We source only the highest quality leathers from Italian and Brazilian tanneries. We have a double selection and quality control of leathers cut by experienced tailors. We order fabrics only from the largest and best manufacturers, ensuring that the client receives furniture of the best standards and quality. **G U A R A N T E E** All furniture produced by us is covered by a 2-year warranty. Thanks to our service, we provide full warranty and post-warranty support.

CLEAN RELEASE

FENKS

The upholstered elements program H U G O is an amazing proposal due to its natural composition. Created from completely natural elements that have a very good representation in reality and have an ever-growing group of supporters. Users of H U G O furniture are delighted with its practicality and functionality, especially the very large area of the resting place. It is precisely for these advantages that every good design should have, that our group of designers and constructors spent many hours analyzing the basic needs of users of upholstered furniture.

COMFORT LIKE POETRY

FENKS

Beauty has always attracted. Character never leaves. In the C A L I A furniture, we combine both features in an unparalleled way. In this program, we can confidently say that your wishes and our possibilities are a reality. C A L I A is the first generation of elegance and refined comfort, not only due to its elegant proportions but also thanks to various positions and seating innovations. With the option to choose (metal shades) of legs, you can add the perfect finish to your personal lifestyle. The comfort of relaxation/resting while sitting is also adjustable through individual headrest angle settings. This feature provides additional comfort for those who enjoy reading or watching television. The C A L I A set in its program of elements has a very useful and functional so-called "worktop". It can be used as needed to create sofas with an individual character for the interior.

STYLE and ELEGANCE, ALWAYS

FENKS

In furniture that accompanies you throughout most of the day, not only its function matters. Equally important for satisfaction is its elegance and style, which directly affects the image of the surroundings, creates a pleasant atmosphere, and this, in turn, directly translates into peace and well-being. In the E S P A C E model, this was one of the most important points when starting our work on this project. The strong construction made of hardwood and equally strong furniture board allowed for the creation of an incredibly light image of the blocks from the E S P A C E program. Additionally, the use of highly elastic foams and softening nonwovens enriches the feeling of relaxation, especially in the part of the furniture where a mechanism for changing the angle of the seat and backrest is additionally installed.

GOOD TO BE TOGETHER

FENKS

The B O S S model stylistically refers to a group of well-designed spatial forms that shape your love for design. Although we have stylistically preserved a pattern directly associated with the tradition of furniture making, in the B O S S model we use the latest technologies of contemporary furniture making. Starting from the application of the latest achievements in the technology of producing seating and backrest foams, through ergonomically adapting mechanisms when we want to relax with our favorite book or listening to your favorite music. We close all our ideas in this model with the installation of a function mechanism that will facilitate preparing the furniture for daily sleeping.

FENKS

One goal is to enrich our collection with a piece of furniture that meets your expectations. R E G A L E is a collection of furniture shapes that can be configured in any desired way. A shape with rich optics and equally excellent comfort. With all these advantages that a well-designed form should have. R E G A L E also has functional qualities. All those additional features that are within reach, such as: wide sleeping area, multi-position headrest, Relax mechanism, handy tabletop, and others. It is these that classify this furniture in the class of COMFORT furniture.

THE MAGIC OF COMFORTABLE MOOD

FENKS

The B E R G A M O design maximizes functionality combined with the highest minimalism of form. The comfort we offer in this avant-garde form is the sum of perfectly composed construction materials. The material used in the B E R G A M O model is purely ecological, especially in places where contact with it is direct and long-lasting. The selection of appropriate seating foams and back fillings is the result of multiple tests in our prototype workshop/modeling shop. Thanks to the knowledge and experience of qualified technologists and a modern machine park, we can offer this magical comfort.

BERGAMO CHARACTERISTICS

** All dimensions are given in centimeters, +/- 3 cm

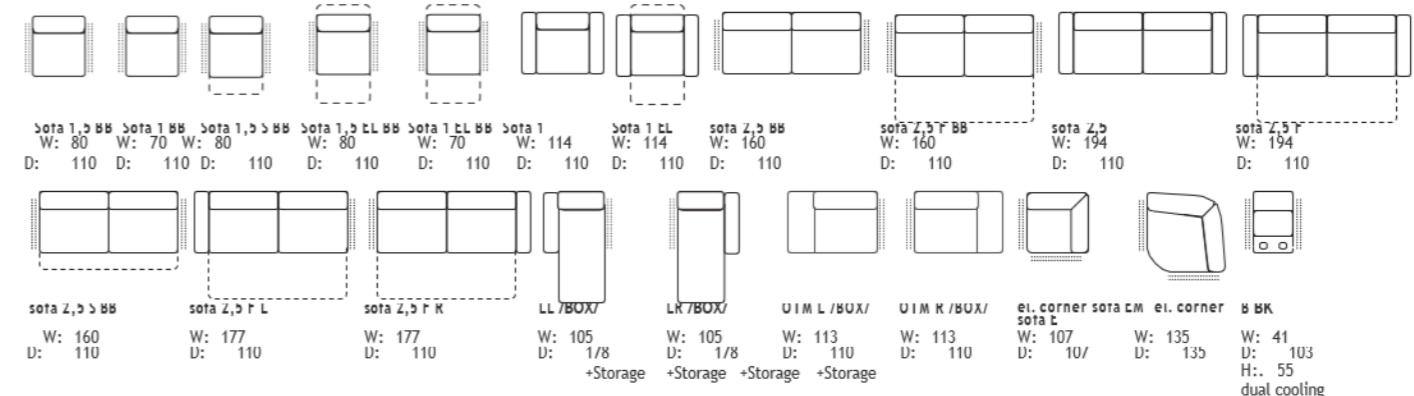

The modularity of this form allows for any configuration, which will become the perfect piece of furniture for round-the-clock relaxation. The shapes with perfectly profiled backs, as well as equipped with a relaxation function when combined with a bar-type element, create a home relaxation area that sets the mood for unique comfort experiences. D O M U S is a model of furniture with an exceptionally stable structure, which is why it is gladly seen not only in home use but also in public utility places. The sets of the D O M U S model are ideal compositions of shapes for a larger group of people who want to comfortably spend conceptual and creative time for further action.

A large, light-colored modular sofa is arranged in a U-shape in a modern living room. The room features large windows and a coffee table. The sofa is composed of several sections, including a long base, a chaise longue, and a corner piece. The coffee table is a low, dark-colored rectangular table with a glass top. The room has a minimalist aesthetic with concrete walls and a large rug.

COMFORT FOR WHAT MORE

FENKS

Modular, system of soft elements with flowing lines. The form ALLURE and the overall appearance is almost minimalism of contemporary architecture. It works excellently in large spaces where space for relaxation and meetings is important. The padded wooden frame is mounted on a plywood structure with high safety parameters. Additionally, secured with bindings and carpentry joints. All to ensure that comfort accessories in the form of highly elastic foams fulfill their roles in one hundred percent of their purpose. The ALLURE model is offered in a wide range of fabrics as well as the highest class of upholstery leathers. Such a wide selection of upholstery materials as well as their combination in terms of color and structure complements the offer for contract orders for places with high usage intensity.

ROMANCE OF DESIGN OVER TIME

FENKS

It is a subtle reference to the great years of Polish design. A classic form in which we used an equally classic folding mechanism. Details such as wooden finishing give the furniture a character of warmth, stability, and elegance. NESCO is an ideal piece of furniture to be 'dressed' in high-quality materials with a noble touch and consistent structure. In addition to a rich palette of fabric and leather colors, there is the possibility to choose your favorite wood stain. Thanks to the use of modern technologies, the NESCO functional block program is suitable for everyday sleeping.

NESCO CHARACTERISTICS

ONLY REMAINS TO SIT

FENKS

This is a furniture program with characteristic furniture legs and stitching on the seats. The comfort of the E S P R I T model, like in every furniture set, is the sum of the skills and daily experiences of our designers and technologists. Thanks to them, comfort and proportions of perfect ergonomics enrich the good experiences of time spent on any configured sets. Considering that the E S P R I T program has a foldable sleeping function, the whole must be made of high-quality and durable materials. Additionally, it is worth noting that the sleeping mechanism will not damage the floor surface or other elements of its decoration.

COMFORT HAS ALWAYS A SOLUTION

FENKS

The L O R E N furniture set belongs to the line of traditional furniture with a slight touch of modernity. All materials and components used in this furniture are innovations of technological thought. L O R E N has a simple to operate and solidly constructed mechanism that easily and lightly transforms from a sofa into a comfortable sleeping surface. For complete satisfaction of owning the LOREN model, we have developed a drawer in the lower part of the seat. It is a pull-out and very spacious place for everyday items. The seating and backrest part is shaped according to the principles of good upholstery tradition. High-elasticity furniture foams have been additionally wrapped in a special nonwoven fabric that softens and enhances the feeling of comfort and relaxation. The L O R E N model looks great in fabrics with a high abrasion standard as well as in furniture leathers, which we present in our samples available from our trading partners.

FENKİ

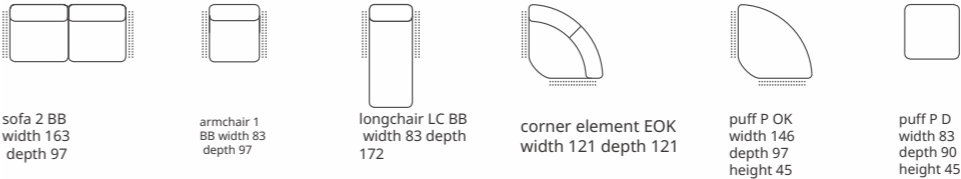

It was a pleasure to create this wonderful piece of furniture, as well as a great feeling to enjoy that it will meet the expectations of its users. The ILLUSION program is fully a proposal of furniture that meets all the requirements of modular furniture. Its mobility and wide configuration of elements allow for adapting the furniture to interiors not only of standard sizes but also to artistic spatial visions. At "first glance," the program with a small number of elements in its offer provides an inexhaustible possibility of arrangements with little effort. The only limitation is one's own sensitivity to "tuning" the shape of the furniture to the interior. Ergonomic seating combined with a well-shaped backrest is an excellent response to the fatigue that strikes at the end of a busy day, and the "longchair" element is the quintessence of what is called the reduction of exhaustion from hard work. The seating surface of ILLUSION is not only comfortable in its softness but also practical for the need of relaxation. The entire program has been built on specially selected seating springs as well as hardwood and highly elastic polyurethane foams tested particularly for this type of (modular) furniture.

MANY PLACES OF COMFORT

FENIKS

It is an impressive furniture block with an interestingly designed variety of upholstered fabric. Smooth surfaces of the furniture contrasted with surfaces featuring modern quilting. Both the armrest and the back cushions in a quilted geometric pattern are options that should be selected when choosing the selected blocks of the entire GIOVANNI set. To enhance relaxation comfort and care for proper seating ergonomics, the GIOVANNI model is also equipped with lumbar cushions, which significantly affect spinal relaxation. The construction of the GIOVANNI furniture, like all our furniture from the FENIKS '24 collection, is based on elements made of hardwood with cross-sections that guarantee safety during proper use. The entire foam-wood construction rests on furniture legs made of metal of the highest quality standard. Additionally, we offer a wide range of galvanization starting from the color of traditional copper to the color of black chrome.

YOU DECIDE ON THE APPEARANCE

FENKS

The evolutionary step of tradition is a consequence of the optical lightness of A L I S O N. In it, we propose innovation and synthesis of well-designed furniture. Furniture that is a crucial utility sculpture for the mood of the interior. Modernity in the modular program A L I S O N also includes innovative technological solutions, functional solutions, and appropriate use of colors and savings on decorations. It is also in this model that we were guided by the words of the famous architect Louis Sullivan, that "...form follows function." (FORM FOLLOWS FUNCTION [3F]). The construction of the ALISON model is based on selected furniture boards in terms of load. These are connected with hardwood strips of the appropriate cross-section for the construction. The seat springs and elastic belts in the back are the core of the applied high-resilience polyurethane foams, which greatly enhance the unique comfort. Complementing this are, of course, upholstery fabrics and leathers sourced from European tanneries and respected textile factories in Western Europe.

ON THE BETTER SIDE

FENKS

Incredibly intuitive furniture. Its wide range of types allows for the personalization of the appropriate set. C O M P A S S in its program includes both units with easily convertible sleeping surfaces and surfaces for daily relaxation. Even the most artistic mind will create a set of units that meets their needs and complements the designed space. The visually strong unit rests on slender and meticulously designed legs, balanced and positioned within the complete unit of the furniture, to form an integral whole, rather than just being a necessary addition. As in each of our corner proposals, in the C O M P A S S model we remembered about the places that are not visible on a daily basis but are always needed. The spacious container for storing bedding is additionally ventilated to keep the bedding always fresh and pleasant. The units from this collection have the best foams currently available and used in the seats and backs of upholstered furniture. Additionally, the upholstery fabrics are backed with a special nonwoven fabric that has a direct impact on the feeling of softness and coziness of the seating.

TUNED INTERIOR

FENKS

The maximum sense of comfort is the only goal that the perfectly shaped backrest and the entire structure of the furniture should serve. L O F T is the ideal solution with its well-shaped seating, providing the most comfortable afternoon relaxation for those with high demands for the quality of rest. The corner set additionally offers a sleeping function and a container with additional ventilation significantly affecting the freshness of the bedding. The shape and style of the L O F T model look great in madras or semi-aniline leathers, further emphasized by slender wooden and metal legs. This combination mainly works well in modern living rooms where it occupies a central place.

VOLCANO FUNCTIONALITY

FENKS

Designed for demanding individuals. MAYON is rich in the selection of connectors for basic elements such as handy bars and functional laptop tops. Their wide selection, each characterized by an individual function and shape, allows for matching the right one to individual needs. The equally rich program offer allows for the personalization of one's own furniture shape adapted to individual interiors. Their function (sleeping function, relaxation function) and two types of corner elements are a solution for the most discerning expectations. Comfort places in the form of a reclining backrest and a pull-out supporting element for tired legs are the essence of regeneration for the next well-planned day. In our corner furniture, spacious sleeping areas are characteristic. This is also the case in the MAYON furniture program. The "Dolphin" mechanism is a childishly simple way to create a truly bedroom space with good sleeping comfort from a day-long furniture piece.

RELAXATION ZONE

FENKS

The A R O N A program consists of basic furniture elements (armchair, two-seater sofa, three-seater sofa) based on the idea of supporting well-being in the comfort of home. The furniture from the ARONA program is also aimed at people with special needs to improve their quality of life. Its dimensions allow for placement in common areas such as open living spaces with kitchenettes, where every centimeter of the apartment is extremely valuable. The A R O N A model is also a place for shared relaxation by incorporating the RELAX function. It is here that all tired body parts will find relief and the intended state of comfort. Its compact form and optical lightness encourage the purchase of this model not only for residential spaces but also for public utility spaces such as cafes, halls, lobbies, or social meeting places. A R O N A looks great in high-quality fabrics offered from our rich selection.

The warm atmosphere that this furniture spreads is just its classic advantage. The main and most significant value – as befits upholstered furniture – is its comfort. The use of highly elastic foams with a high resilience factor provides the user with incredible relaxation experiences. Additionally, the depth of the seat and the corresponding height of the backrest with additional lumbar support cushions ensures that the pleasure of sitting is endless. Due to its natural design, the S Y C Y L I A model perfectly harmonizes with not only modern interiors but also enriches classic arrangements. Every form of this amazing furniture looks great, and since the fabrics in our samples are available in various colors and textures, it is easy to match the furniture to one's own needs and preferences. With appropriate accessories such as legs (available in various finishes) or the mentioned lumbar cushions, the S Y C Y L I A program is timeless and creates a coherent interior styling for every moment of life.

The P L A N E T model is one of the few furniture proposals we have without a sleeping function. That is why we could focus all our work on comfort and ergonomics. Therefore, the P L A N E T model has very soft and carefully shaped seats that encourage afternoon relaxation. Besides the extraordinary comfort, it delights with a subtle form that allows for contrasting upholstery colors with extravagant armrests. Additionally, to improve comfort, easy-to-install headrests are available. The entire P L A N E T program is an ideal solution for those who primarily want to relax on the furniture and spend pleasant evenings among friends. P L A N E T is also a piece of furniture with shapes that work perfectly in public utility places such as waiting rooms, halls, or hotel lobbies. The refined shape and timeless design will complement interiors designed with artistic care.

For example explanations see "Explanations of used symbols" p. 150-152**All dimensions are given in centimeters, +/- 3 cm

A piece of furniture that is both elegant and modern. S C A N D I C is an offer for supporters of avant-garde shapes and solutions that cannot be overlooked. All elements of its shape are rounded, gentle, and subtle lines that do not require unnecessary additions. The essence of the S C A N D I C model is not only its form but also its function. Our efforts for the functionality of the modern structure have resulted in the incorporation of a mechanism for occasional sleeping surfaces in such a subtle form. The entire construction of the furniture, as well as its modeling and functional mechanisms, are designed to serve one purpose – maximum user comfort.

TO SAY
COMFORT IS
TOO LITTLE

FENKS

A massive and dignified form, impressive in its design. Wooden feet give it an industrial character and a raw expression. The use of good construction materials and high-quality nubuck leather is an additional advantage of this dignified design. Utilizing these quality features guarantees long-lasting satisfaction. In addition to the traditionally built structure and proper use of elements, a piece of furniture like P R E S T I G E fulfills its primary role - relaxation as well as the function of an occasional sleeping surface. The application of double springing - wave and pocket springs - is particularly significant with frequent use of the furniture. A major advantage of P R E S T I G E is its wide range of blocks from which any configuration can be built to perfectly fit selected interiors.

FENKŚ

Every lover of home comfort knows how important a suitable upholstered piece of furniture is in the living room, with all its comforts and conveniences. A piece of furniture that not only fulfills its basic functions but also charmingly affects the owner's well-being and the interior decor. The entire PESARO model program has been created to harmonize with other elements of interior decor, so that its form serves as a connector of the design of the entire environment. Furniture with such design usually features a very simple form, making it easy to fit into the most sophisticated spaces. The greatest advantage of PESARO is its size, which can accommodate a large family or friends during pleasant gatherings. PESARO, like every piece of furniture in our offer, is "dressed" on all sides with the appropriate fabric, so the interior where it finds its place in the middle of the living room does not negatively affect its evaluation. The PESARO program is equipped with a wide range of bars with various additional functions as well as elements for direct relaxation type Relax. Thanks to these conveniences, the element that will stand in the favorite spot of the living room will become a sought-after area for spending free time.

ADAPTED TO NEEDS

FENKS

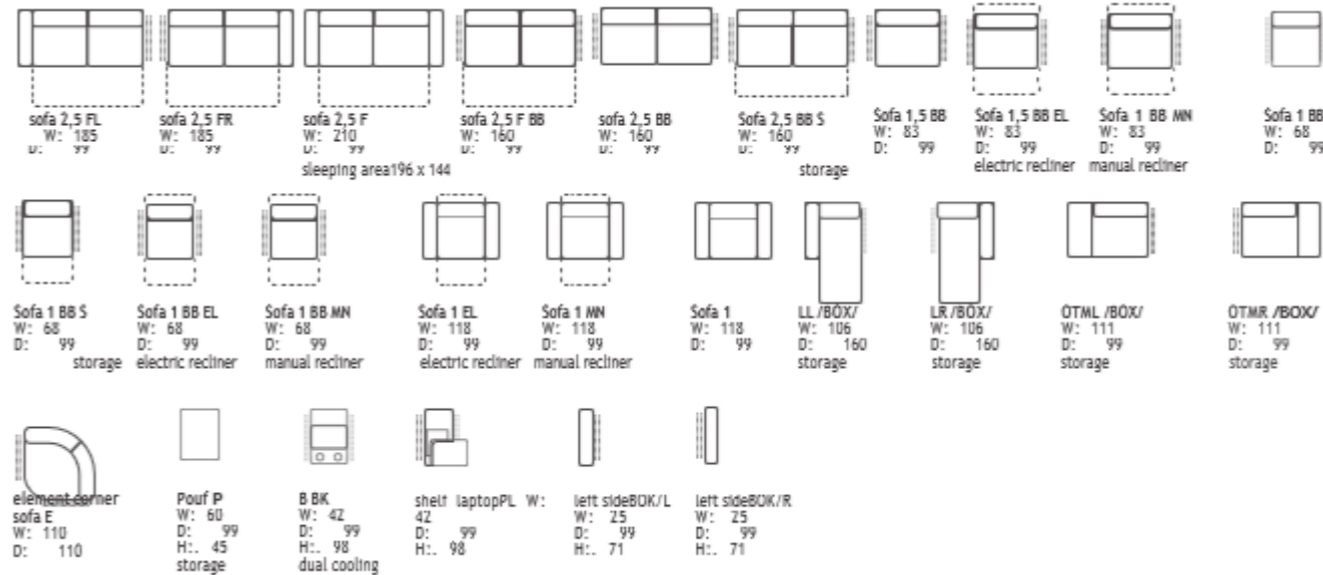

It is characterized by a high ability to configure its own layout from the program shapes. This is a "family" of very comfortable and elegant modules. The visual massiveness of the model results from the use of high-quality upholstery materials as well as construction and furniture components. Highly elastic polyurethane foams, which directly affect the feeling of comfort during rest, rest on its structure. This, in turn, is made of hardwood and seasoned furniture board maintained at the proper humidity. Such storage of construction materials directly affects the long-term durability of the furniture during twenty-four-hour use. The fabrics we offer in our furniture have a high Martindale test coefficient. Only those fabrics that have the appropriate raw material used on the looms pass the abrasion test. Another upholstery material that looks very good on the M O T I O N furniture is leather with a high coefficient of elasticity and resilience. Our furniture leathers are high-quality products from European tanneries.

MANY POSSIBILITIES

FENKS

Practical solutions for many contemporary and modern interiors. The L O R E N Z O model is a thoroughly modern form with a relaxation and leisure function. The optical lightness of this furniture directly refers to good European design. The shape of the L O R E N Z O model is devoid of any unnecessary decorations, and its image is based solely on the flow of gentle and sensual lines. The seat construction is based on springs of carefully selected lengths, which guarantees a long period of use. As with all our furniture, we have also taken care of additional storage in the form of a large container in the longchair section. Both the sofa and the corner are in dimensions suitable for small apartments. L O R E N Z O is a piece of furniture perfectly suited for combining colors and types of fabrics.

SEWN TO MEASURE

FENKS

A relaxation program that includes modular blocks allowing for the configuration of any set such as: corner sofas, sofas, and other sets. Modules with extended seating such as long chairs provide the resting person with the opportunity to comfortably position their legs, which in turn guarantees full relaxation for the whole body. For greater comfort, universal headrests have been designed and installed, which can be moved to the block on which one rests. The L I N O modules are additionally equipped with a foldable spacious sleeping area, and most blocks are also equipped with large storage containers for bedding. The seats in the L I N O model are made of carefully selected polyurethane foams, additionally reinforced with springs with a high elasticity coefficient. The visible stitching on the seat, apart from visual advantages, also has structural tasks, i.e., it protects the seat from excessive wrinkling during use. Thanks to such measures, the L I N O model can fulfill not only its basic task of providing seating comfort but also serve as a place for nighttime rest or a play area for children.

SHARE THE INTERIOR

FENIKS

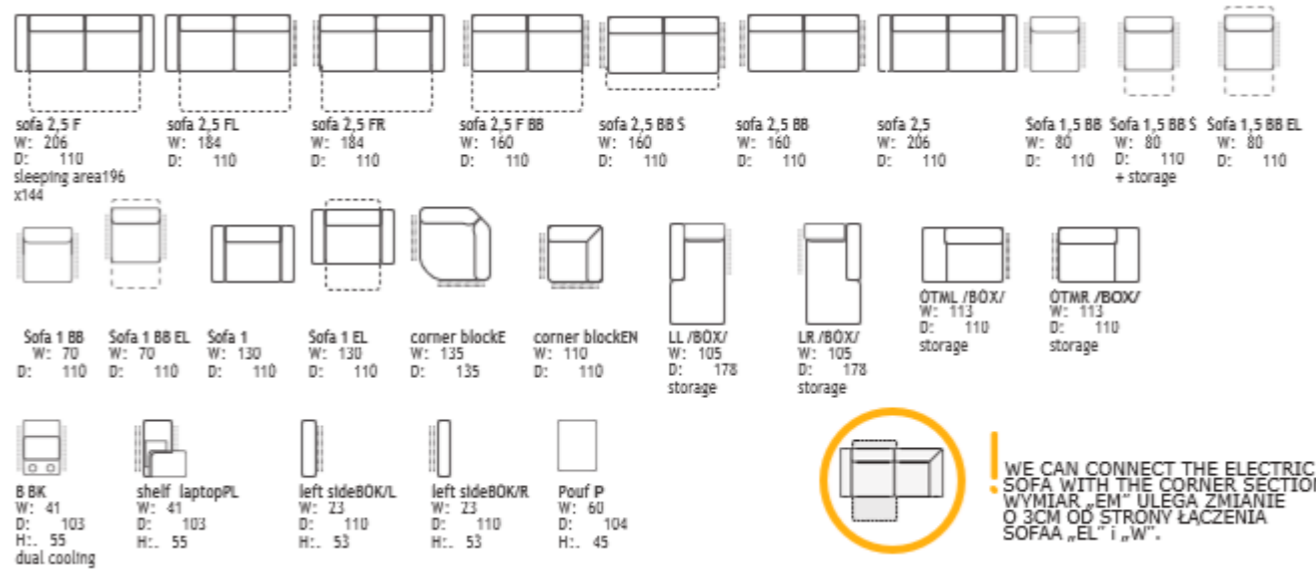

In this project, we continue the desire to present furniture forms that can be easily and pleasantly built into any spatial shapes. Our fabric and leather sample only emphasizes this timeless furniture form. In this specific case, it can be stated that one of the many features of a perfect shape is co-creating the entirety of the room. This sum significantly influences the character of the environment in which it exists and has considerable emotional value during its time spent. G E N E S I S is designed in its form and function to soothe every need for comfort. The comfortable and ergonomic ratio of seat to backrest, additionally supported by positioned headrests and spacious sleeping area, is the right choice for spending evenings with loved ones.

CONSCIOUS CHOICE

FENKS

The presented program offers practical solutions for many contemporary and modern interiors. The B A G G I O model is a modern form with an occasional sleeping function type "Dolphin". Both in design and visually, the furniture evokes good Polish design. B A G G I O is devoid of sharp and decisive cuts, and all lines flow gently emphasizing this interesting form. The seat construction is based on springs with high elasticity characteristics, which guarantees the use of the furniture for a very long time. In the corner set, in addition to the standard container under the seat in the "longchair" part, there is an additional and very spacious storage. Both the sofa and the corner unit are in dimensions suitable for apartments of classic size. Everything is built on a solid wooden-plywood construction and furniture board. B A G G I O is a piece of furniture excellently suited for combining colors, types of fabrics, and furniture leathers.

WE CREATE
FOR YOUR
HAPPINESS

COMFORT PLUS PRESENTATION

FENKS

A sleek and timeless form. With light and designer shapes. The slimness of the B E N E T T O model is achieved by using high furniture legs. This piece of furniture with an unusual form is not just a proposal with obvious shapes, but also an excellent alternative with a comfortable and spacious sleeping area. B E N E T T O surprises with its functionality also due to its small size. Thanks to this, the sofa is a good choice for interiors with limited living space. The strong and solid construction is built for comfort and ergonomics, so it should not be surprising that the surprising comfort and long relaxation on long evenings will be a solace in its coziness. The B E N E T T O model presents itself perfectly in high-quality fabrics in terms of color quality, texture, and abrasion resistance test. All fabrics from our sample emphasize the advantages of the furniture and meet all the refined needs of the owner.

* The manufacturer reserves the right to use different naming for elements ending or starting with the side. IN GOOD COMPANY

FENK

The program of leisure units consists of both freestanding units and modules in corner arrangements. The module with an extended seat - type longchair, is a place where the person resting has the opportunity not only to relax in a typical sofa position but also to comfortably stretch their legs, ensuring full relaxation. To enhance the feeling of comfort, the backrest cushions have been extended upwards, and lumbar cushions have been added with the possibility of individual adjustment. The M O Z Z A model is additionally equipped with an easily foldable sleeping function, providing a surface comparable to a bedroom bed, as well as a large bedding container. The seats in the M O Z Z A model are made of carefully selected furniture foams, additionally reinforced with a wave seat spring of stable cross-section. Everything is mounted on a solid structure made of hardwood and furniture boards with the appropriate moisture content.

AMONG THE
DIMENSIONS

FENKS

It is a continuation of furniture with a widely developed program of blocks from which an independent spatial form can be built to fit the chosen interior. The G A R R E T program offers very soft and comfortable seating, as well as ergonomically shaped backs with the possibility of headrest angle adjustment. Just like in all our furniture collections, in the G A R R E T program, without putting in much effort, we can easily transform a comfortable piece of furniture into an equally comfortable place with a significant sleeping area. The blocks of G A R R E T are made of selected wood with appropriate moisture, which ensures calm and good use for years, and the proper selection of fabrics and leathers from our offer guarantees a sense of a successful and accurate purchase.

* The manufacturer reserves the right to use different naming for elements ending or starting with the side. IN THE CIRCLE OF GOOD ATMOSPHERE

FENKS

Spacious rooms need something more than just elegance and style. An additional spatial form must influence its entirety. E M P O R I O is such a form, 'inscribed' in the nature of each element creating the whole, thus enriching and emphasizing the character of the interior. This balance between the furniture body and the surroundings creates harmony. E M P O R I O is the answer to such a perception of the aura of home comfort. Classic stitching and comfortable armrests in two sizes combined with simple edges give seriousness to a solid and classic construction in its form. E M P O R I O, along with its utility and attractive design, will perfectly fit into the segment of furniture where comfort and seating comfort are additional attributes that are highly desired among friends.

FURNITURE LAMP DEDICATED TO MAYON AND PESARO

COVERING BLEND

The covering blend is used for an aesthetic finish of the body on the side without an armrest.

COMODO SKIN AND FABRIC CARE PRODUCTS

When buying furniture, we would like it to serve us as long as possible and to remain as new for as long as possible. Daily use, contact with grease, colored clothing, UV radiation, as well as various accidental events (dirt, stains, or scratches) negatively affect the appearance of our furniture. Therefore, their care is so important. Key is not only cleaning but above all maintenance, which means protecting them from the harmful effects of external factors. Impregnation products act like an invisible cover and leave a micro-coating on the furniture that protects against dirt and excessive wear. It is very important that the impregnation process (especially in the case of furniture made of natural leather) is carried out immediately after purchasing the furniture and before starting to use it. This will help avoid many problems in the future. For the care of upholstered furniture in both natural leather and fabric, we recommend specialized COMODO Lederzentrum products, which are the only ones on the market to have a positive opinion from the Leather Industry Institute, are tested, recommended by specialists, and above all safe.

SLEEPING FUNCTION type DOLPHIN

Some upholstery materials may exhibit typical characteristics of upholstery fabrics: sensitivity to touch and shimmering, i.e., variation in gloss and shade depending on the angle of light (even in the same batch of material), e.g., in segments of corner sofas connected at an angle, as well as piling, which is the micro-fibrillation of fibers (piling, i.e., the formation of knots/balls on the surface of the fabric). Visible thickening can be removed manually or entrusted to a professional company. Sensitivity to touch, shimmering, and micro-fibrillation of fibers are natural characteristics of fabrics resulting from their properties.
